

Is your night being constantly interrupted by the need to urinate?
Is your day disrupted by excessive toilet visits?
Do you feel the need to rush to the loo?
Once there do you find it difficult to start?
When you urinate is the flow weak, or just a dribble?
Do you feel you have more to come when the flow has stopped?

IF YES

YOU MAY NOT HAVE PROSTATE CANCER
But play it safe, see your doctor - **CHECK IT OUT**
