

ARE YOU OK?

Did you know there are 35,000 men a year who are diagnosed with PROSTATE CANCER

Check for these symptoms

- If you have disturbed nights needing to go to the loo
- If you have difficulty starting
- If the flow is weak, just a dribble, or
- If you have more to come when you have stopped.

**Even with these symptoms –
You may not have prostate cancer.
But when 10,000 men a year die from
prostate cancer through not getting
diagnosed early enough**

**Don't take the risk
Don't ignore the symptoms**

**SEE YOUR DOCTOR
CHECK IT OUT**
