

IS YOUR MAN OK?

Did you know there are 35,000 men a year who are diagnosed with **PROSTATE CANCER**

Check for these symptoms

- If his nights are disturbed by needing to go to the loo
- If he has difficulty starting
- If his flow is weak, just a dribble, or
- If he feels he has more to come after stopping

**Even with these symptoms –
He may not have prostate cancer.
But when 10,000 men a year die from
prostate cancer through not getting
diagnosed early enough**

**Don't let him take the risk
Don't ignore the symptoms**

GET HIM TO SEE A DOCTOR
